

Company profile

Jiangxi Risun Green Energy Co., Ltd Jiangxi Risun Solar Energy Co., Ltd

Company Profile

Established in January 2008, Jiangxi Risun Solar Energy Co., Ltd. is the manufacturer of crystal silicon solar cells, solar panels and photovoltaic products as well as the professional photovoltaic systems engineering contractors and builders. Risun is the partner of the world top 500 enterprises and it is the leading enterprise supported by the province and city government. In 2016, Risun was listed in the top 100 private enterprises and private manufacturing enterprises in Jiangxi with the highest income among the private enterprises in Xinyu.

In December 2016, the company completed the division and the existing Jiangxi Risun Solar Energy Co., Ltd. focus on power station business while the new Jiangxi Risun Green Energy Co., Ltd. concentrates on cells and pannels manufacturing, will seek to enter the capital market and promote the company to develop faster and better by improving the management level and

Development

history In December 2016. Jiangxi Risun Green Energy Co., Ltd. was established In August 2016, solar cells manufacturing depart completed the automatic transformation. The cells capacity increased to 1GW. In December 2015, pannels Phase I completed the automatic equipment transformation. The pannels capacity increased to 600MW. In November 2014. Pannel phase II completed the automatic equipment transformation and introduction of new equipment In December 2012 pannels manufacturing depart phase II began the production. In June 2010, pannels phase I began the production. In September 2010. Solar cells manufacturing depart phase III began the production In April 2010, Solar cells manufacturing depart phase II began the production. In November 2008, Solar cells manufacturing depart phase I began the production.

In January 2008, Jiangxi Risun Solar Energy Co., Ltd.

was established.

Solar cells intelligent manufacturing

The Solar cells production lines introduce the foreign advanced automatic manufacturing equipment to achieve the automatic production of the whole process. Big data display statistical system provides the foundation support for improving products quality. Rate of Class A reaches 98.34%.

Intelligent factory

The factory has installed more than 400 directional HD cameras, achieving full coverage of the factory. All the monitoring images will be uploaded to the host and cloud with 24 hours real-time monitoring. Through the digital management, the customers over the world can download the APP to their mobile phone or computer to inspect the production of the factory any time, which all replace the tradition method of appointing teld engineers to supervise the production process in the factory.

Order Form

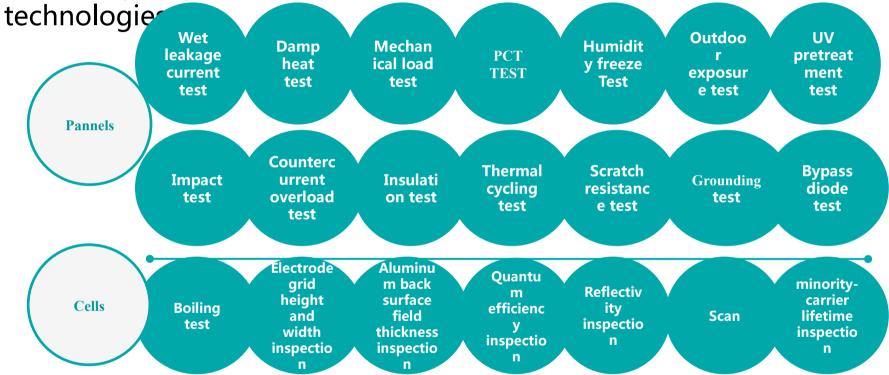

based on promoting of the original ERP system function, the company has fully introduced and developed the integrated industrial intelligent manufacturing systems such as MES, SPC, WMS, CCS, etc. which perfectly match our manufacturing system. The integration between the industrial internet (RFID radio frequency identification, Ethernet, sensor, etc), industrial software, OA office system and automatic integration and the production lines will implant the intelligent nerves into the whole manufacturing system of the factory.

The leading quality testing technology within the industry

Over 30 quality detection

Risun has passed the three management systems certification of IS9001-2008. ISO14001:2004, OHSAS18001:2007 and other international certification such as TUV, CE, UL, PV, CYCLE, etc. The company strictly operates according to the quality management system and management procedures, making the control of quality target covering the whole process.

R & D capability

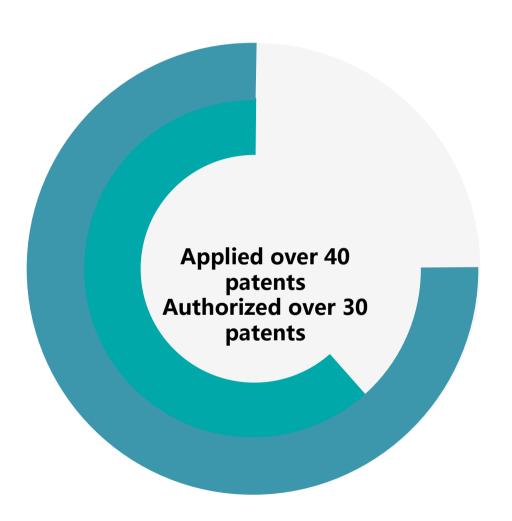

Based on the provincial technology center, a comprehensive professional photovoltaic research and development platform- provincial enterprise technology center is established to study the electrical safety of photovoltaic products, photovoltaic power generating performance and the lifetime in long term outdoor service, providing a basic
